

pest control products			
Product	Indication	Composition	Reg No
DEWORMER			
Askaritox Worm Remedy	Worm remedy	Piperazine dihydrochloride 64.5% m/m	G380
Ecomintic 50	A broad spectrum anthelmintic which is active in large and small ruminants against many species of worms	Fenbendazole 5% m/v	G2000
Levicon Concentrate	A roundworm remedy	Levamisole HCl 25% m/v	G1122
Panacur 4% Powder	A Roundworm remedy for pigs and cattle as well as a roundworm and milk tapeworm remedy for sheep and goats.	Fenbendazole 4% m/m	G0169
Panacur BS Liquid	Anthelmintic for cattle, sheep, goats, horses and ostriches. A roundworm remedy for cattle, horses and ostriches. A roundworm, lungworm and milk tapeworm remedy for sheep and goats.	Fenbendazole 5% m/v	G1481
Tramisol Concentrate	A roundworm remedy	Levamisole HCl 25% m/v	G0806
Virbamax Premix	Prevention and treatment of internal and external parasites	Abamectin 0,6% m/v.	G3122
FLY CONTROL			
Agita 10 WG Paint On	A paint on bait containing a residual action stomach and contact insecticide with an attractant for the control of flies	Thiamethoxim 100g/kg & 9-Tricosene 0.5g/kg	L6670
Agita 1 GB Scatter Bait	A ready to use granular bait containing a residual action stomach and contact insecticide with an attractant for the control of flies	Thiamethoxim 10g/kg & 9-Tricosene 1g/kg	L7180
Ectomin 100EC	For use on all animals to protect against Ectoparasites ie Mange Mites, Lice, Ticks, Keds and Flies	Cypermethrin 100mg/L	G3314
Killem Super Fly Bait	An attractive fly bait for the control of houseflies in and around animal housing, refuse tips, manure heaps and food handling plants.	Methomyl 10g/kg, Tricosene 0.50g/kg	L4578
Kunafin Parasitioids		Live insects	
Larvadex	A feed through larvacide for fly control in poultry houses	Cyromazine 10g/kg	G641
Neporex 2SG	A water soluble granular larvacide. It is used to prevent fly and mosquito larval development in breeding sites.	Cyromazine 20g/kg	L3055
Neporex SP 50	A water soluble powdered larvacide. It is used to prevent fly and mosquito larval development in breeding sites.	Cyromazine 500g/kg	L6440
Quickbayt	An attractive spray or paint-on fly bait with long residual action for the control of houseflies in and around animal housing, refuse tips, food handling plants and outside domestic and industrial premises	Imidacloprid 100g/kg Tricosene 1g/kg	L7802
PARASITE CONTROL			
Baythroid WP	For the control of houseflies, stableflies, fly maggots, mosquitoes, cockroaches, bedbugs, fleas, fishmoths, ants and mites	Cyfluthrin 100g/kg	L2198
Bayticol	For the control of ticks, mites, flies	Flumethrin 2% m/v	G489
Drastic Deadline	For the control of ticks	Flumethrin 1% m/v	G723
Karbaspay 850WP	A wettable powder contact and stomach insecticide for agricultural public health and household uses as listed.	Carbaryl 850g/kg	L1195
Stopatik	B-Controls ticks, house, stable and face flies, O-Kills red lice, controls Karoo paralysis, ticks, bont legged ticks	Cypermethrin 2% m/v, piperonyl butoxide 8% m/v	G1431
Taktic Pig Pour On	Kills Sarcoptic mange mites and lice on pigs.	Amitraz 1% m/v	G2574
Triatix Pig Pour on	Kills Sarcoptic mange, mites and lice on pigs	Amitraz 2% m/v	G3381
RODENTICIDES			
Supa-Kill Bait	Supa-Kill Granular Bait is a natural food source to rodents and therefore is far more palatable. The Granular bait is wheat impregnated with the active ingredient. We recommend that the granular bait be used where there is little or no food competition eg Dog food, rice, wheat or bird seed. This product can be used either for internal or external baiting, using a Supa-kill Tamper Proof or Cardboard bait station.	Bromadiolone	L5198
Supa-Kill Block	The Supa-kill block is a combined natural feed which has been compressed. The block can be secured to the pin in the Tamper Proof bait station. This prevents the rodent from moving the block and contaminating other food sources. The block contains Bitrex which is an extremely bitter deterrent. This however does not affect the palatability where rodents are concerned as they cannot taste it. The Supa-Kill block can be used both internally and externally.	Brodifacoum	L6325
Supa-Kill Liquid	It is recommended that Supa-Kill liquid should be used where there is food competition and the food source cannot be removed. In our formula we have added an attractant, therefore it is not necessary to add sweeteners. It is advisable to use either the granular or blocks, where rodents have easy access to water.	Brodifacoum	L5987
Tamperproof Bait Station	Tamper Proof bait stations are very versatile, they are suitable for use virtually anywhere, i.e. inside homes, gardens, poultry farms, piggeries and industry. It can be placed flat or upright allowing rodents access through the holes provided. Supa-Kill granular bait, blocks as well as liquid can be used inside the bait station. The bait stations are lockable and come complete with a key on a metal key ring, this key ring is detectable with a metal detector for food processing plants (one key fits all).		
Supa-Kill Candle	Citronella oil is a natural oil that has been used effectively to repel mosquitoes for many years. By incorporating the oil in candle wax, a pleasant smell, a source of light and a mosquito repellent is produced when lit. With the wax being placed in a tin, there is no loss due to running, all the wax is used. Ideal for camping and indoor use. Each candle will burn for approximately 16 hours.
