

POULTRY MEDICATION			
Product	Indication	Composition	Reg No
anticoagulants			
Baycox 2.5%	For the control of coccidiosis in poultry	Toltrazuril 2.5% m/v	G979
ESB 3	A water soluble powder for the treatment of coccidiosis and infectious coryza in poultry	Sulphachlorpyrazine Sodium 300g/kg	G1305
macrolides			
Aivosin WSP	Contains the innovative antibiotic tylosin, which is rapidly absorbed and concentrates in target tissues to provide proven control of major respiratory and enteric diseases in both pigs and poultry.	Acetyl-isovaleryl-tylosin tartrate 850mg/g	G1598
Tylan Soluble	Prevents mycoplasmosis in broiler chickens and replacement pullets	Tylosin 77-95% m/m	G621
Tartrate WS Powder	Prevents mycoplasmosis in broiler chickens and replacement pullets	Tylosin Tartrate 80% m/m	G903
Tylosin Tartrate Pure	An aid in the prevention of mycoplasmosis in broilers and replacement pullets.	Tylosin Tartrate 100% m/m	G1043
sulphonamides			
Biaprim	Treatment of infections in fowls caused by bacteria sensitive to sulfadiazine and trimethoprim	Sulphadiazine sodium 20g, trimethoprim 4g/100ml	G2430
Coliprim	For the treatment of primary and secondary infections of the alimentary, respiratory and urinary tract caused by Gram-positive and Gram-negative bacteria.	Na Sulphachlorpyridazine 10% Trimethoprim 2%, Phenoxethanol 0.6% m/v	G1642
Cosumix Plus	A water soluble powder for the treatment of bacterial infections in animal	Sulphachlorpyridazine Sodium 100g/kg Trimethoprim 20g/kg	G2036
Methoxazol-T	Poultry: Particularly for treatment and control of E. coli, P. multocida, Staphylococcus, Gram +ve and Gram -ve infections in poultry, coryza.	Sulphamethoxazole 10% , Trimethoprim 2%	G2997
Sulfazine 16%	For treatment of coccidiosis and coryza (croup) in poultry	Sulphadimidine Sodium B.P. 16% m/v	G1123
Triple Sulpha	Water soluble sulpha-based powder for the treatment of coccidiosis and haemophilus coryza with Vitamins and Electrolytes as an aid to supportive therapy	Per 100g: Na Sulphamerazine 27.2g , Na Sulphamethazine 27.2g , Na Sulphathiazole 29.85g, Vit A, Vit D, Ca, Mg, K	G275
tetracyclines			
Oxyvit WS 5%	For treatment of secondary infections caused by organisms to tetracyclines, following respiratory diseases in fowls and turkeys.	Oxytetracycline base 5% m/m, Vitmins	G1166
Phenix Oxyphen 20%	For treatment of secondary infections caused by organisms to tetracyclines, following respiratory diseases in fowls and turkeys.	Oxytetracycline base 20% m/m.	G1382
Pulmodox 50 OSP	Treatment of bacterial respiratory disease and bacterial gastro-intestinal infection in fowls	Doxycycline hyclate 50% m/m.	G3195
Terramycin AF	Water soluble powder for the treatment of bacterial infections in animals	Oxytetracycline HCl 55mg/g	G1344
TFC	Treatment of respiratory disease caused by organisms susceptible to tetracyclines	Tetracycline disodium salt phosphate complex 50%	G2402
OTHER			
Bedgen 40	Supportive therapy in liver damage, improves liver function	Cynara liquid extract 15g. Choline chloride (70%) 15g. Antitoxic hepatic factor 2g	V13071
Fosbac + T	For the treatment of Gram positive and Gram negative infections, OR, Mycoplasma	Fosfomycin 20%, Tylosin 5%	G2810
Mentofin	A natural, water soluble concentrate based on the ethereal oils, menthol and eucalyptus. It provides symptomatic relief for fowls with breathing problems	Menthol, Eucalyptus, Ethereal Oils	G3448
WATER STABILISERS			
Cevamune CPS (1 tab:100L)	An effervescent tablet containing a blue colourant and a chlorine neutralizing agent	Water stabilizing compounds and blue colourant	
Vac Pac Plus (113g:963L)	Water stabilizer with a colourant especially designed to eliminate the negative effects of chlorine in stock solutions and drinking water	Water stabilizing compounds and blue dye	
Vac-Safe (1 tab:100L)	Effervescent tablet to colour and inactivate chlorine in animal drinking water.	Dechlorinating agent and blue colourant
