CAP COLOUR	PRODUCT NAME	DESCRIPTION	APPLICATION
	Avipro AE Vac	Live vaccine (aqueous suspension) for poultry against Avian Encephalomyelitis	For Administration via the drinking water
	Avipro AE/Pox	Live vaccine (freeze-dried) for poultry against Encephalomyelitis and Fowl Pox	For Wing web application
	Avipro Thymovac (CAV)	Live vaccine (freeze-dried) for poultry against Chicken Infectious Anaemia	For Administration via the drinking water
	Avipro ND C131	Live vaccine (freeze-dried) for poultry against Newcastle Disease. Containing the strain clone 13-1.	For administration via the drinking water, by spray or eye drop after resuspension
	Avipro Gumboro Vac	Live intermediate vaccine (freeze-dried) for poultry against Infectious Bursal Disease	For administration via the drinking water, by spray or eye drop after resuspension
	Avipro Precise (Gumboro Vac Forte)	Live intermediate vaccine (freeze-dried) for poultry against Infectious Bursal Disease	For administration via the drinking water
	Avipro ND HB1	Live vaccine (freeze-dried) for poultry against Newcastle Disease	For administration via the drinking water or by spray after resuspension
	Avipro ND La Sota	Live vaccine (freeze-dried) for poultry against Newcastle Disease	For administration via the drinking water, by spray or eye drop after resuspension
	Avipro IB/ND Vac La Sota	Live vaccine (freeze-dried) for poultry against Newcastle Disease and Infectious Bronchitis	For administration via the drinking water or by eye drop after resuspension
	Avipro IB/ND HB1 (Hitchner B1)	Live vaccine (freeze-dried) for poultry against Newcastle Disease and Infectious Bronchitis	For administration via the drinking water
	Avipro IB H120	Live vaccine (freeze-dried) for poultry against Infectious Bronchitis	For administration via the drinking water or by spray after resuspension
	Avipro ILT	Live vaccine (freeze-dried) for poultry against Infectious Laryngotracheitis	For administration via the drinking water or by eye drop after resuspension
	Avipro MD Bivac + 200ml Diluent	Live vaccine (cell-associated) for day old chicks against Marek's Disease	For intramuscular or subcutaneous injection after resuspension
	Avipro MD Lyo + 200ml Diluent	Live vaccine (freeze-dried) for day old chicks against Marek's Disease	For intramuscular or subcutaneous injection after resuspension
	Avipro Pox Vac + 8ml Dil + Needle	Live vaccine (freeze-dried) for poultry against Fowl Pox	For intracutaneous injection after resuspension
	Avipro Reo + 200ml Diluent	Live vaccine (freeze-dried) for poultry against Viral Arthritis and Tenosynovitis	For intramuscular or subcutaneous injection after resuspension
	Avipro Salmonella Vac E	Live vaccine (freeze-dried) for poultry against Salmonella Enteritidis infections	For administration via the drinking water
	Avipro Salmonella Vac T	Live vaccine (freeze-dried) for poultry against Salmonella Typhimurium infections	For administration via the drinking water
	Avipro 101 Coryza	Inactivated aluminum hydroxide adjuvant vaccine for poultry against Infectious Coryza	For intramuscular injection
	Avipro 104 MG Bacterin	Inactivated oil emulsion vaccine for poultry against Mycoplasma gallisepticum infections	For intramuscular injection
	Avipro 105 ND	Inactivated oil emulsion vaccine against Newcastle Disease	For subcutaneous injection
	Avipro 105 ND Chick	Inactivated oil emulsion vaccine for day-old chicks against Newcastle Disease	For subcutaneous injection
	Avipro 106 Reo	Inactivated oil emulsion vaccine against REO virus	For subcutaneous injection
	Avipro 107 (EDS)	Inactivated oil emulsion vaccine for poultry against Egg Drop Syndrome 76 (EDS)	For subcutaneous or intramuscular injection
	Avipro 108 FC	Inactivated oil emulsion vaccine against Pasturella multocida, Types 1, 3 & 4	For subcutaneous injection
	Avipro 109 (SE) 4	Inactivated oil emulsion vaccine against Salmonella Enteritidis	For subcutaneous injection
	Avipro 201 (IB/ND)	Inactivated oil emulsion vaccine against Newcastle Disease and Infectious Bronchitis	For subcutaneous injection
	Avipro 202 (ND/IBD)	Inactivated oil emulsion vaccine against Newcastle Disease and Infectious Bursal Disease	For subcutaneous injection
	Avipro 303 (ND/IB/EDS)	Inactivated oil emulsion vaccine for poultry against Newcastle Disease, Infectious Bronchitis and Egg Drop Syndrome 76 (EDS)	For subcutaneous or intramuscular injection
	Avipro 304 (ND/IB/MG)	Inactivated oil emulsion vaccine against Mycoplasma gallisepticum, Newcastle Disease and Infectious Bronchitis	For subcutaneous injection
	Avipro 421 (IB/ND/BD3/Reo)	Inactivated oil emulsion vaccine against Newcastle Disease, Infectious Bronchitis, Infectious Bursal Disease and Reovirus infections	For subcutaneous injection
